- Microsoft Office/Google Docs
- Adobe CS Suite/GIMP
- (much, much, more)

Networking/Hardware:

- Microsoft Networking
- Unix/Linux Networking
- Computer Assembly and Upgrading
- Email Client/Server Configuration

Employment

- **Lead Developer;** Rev650. (subsidiary of Hurdman Communications, Inc.)
Promoted to lead developer under new business integrated with my own proprietary content management system "Pagefusion". Managed a team of two off-site developers. Re-branded and marketed Pagefusion as "Client Connect CPA" and tailored the system's applications for CPA firms. Developed over 66 embeddable modules that worked together to automatically publish and email content seamlessly.
- **Web Developer;** Hurdman Communications, Inc.
Hired to develop, maintain and support my own proprietary content management system "Pagefusion" in order to host multiple Better Business Bureau web sites. Also maintained other BBB and client web sites hosted on various 3rd-party CMSs and servers whilst working along with a partnering marketing firm.
- **College Webmaster;** Utah State University
Developed and maintained entire web infrastructure for Utah State University's College of Engineering. Provided technical support to college staff and faculty regarding Windows or Mac operating system issues. Maintained (SuSe) Linux servers used for email, web, and database services. Also provided advice and consultation concerning hardware, software and other technologies.
- **System Administrator/Teacher;** Reid School
Developed web infrastructure for www.reidschool.com. Achieved excellent results teaching HTML coding and design techniques to students (K-9). Provided technical support for teachers and school staff. Built and maintained a Microsoft Business Server (Windows NT/2000) for classroom networking purposes. Built and maintained a Linux (RedHat) server and thereon developed a PHP/MySQL-based progress report and email system for use by teachers and students.

- **System Administrator;** Maverick Trading
Enhanced web, IRC, and SQL servers for www.teachmetotrade.com; an advanced online trading web site. Gained experience working with Linux and Windows NT/2000 servers. Developed online time entry and backup system for employees using PERL. Configured several data feeds relayed from an in-office satellite system connected to 3rd party servers including voice chat, stock charting and financial data using PERL/PHP/MySQL and XML.
- **Flash/HTML Development;** Netwide Development (Internship)
Developed Flash and HTML content according to assigned responsibilities. Offer for full-time employment given, but turned down in order finish my University degree.
- **Production Manager;** Exhibit Fabricators
Successfully led a sign production team consisting of 1 graphic designer and 3 construction personnel. Managed sales and budget according to demanding production deadlines. Consistently delivered all projects on time and under budget. Applied knowledge of artistic theory (from University Graphic Design courses) and learned various printing processes and techniques (vinyl plotting, silk-screening, type-setting/layout, etc.) while on the job.
